

INCLTOP #EA#

Print the Email address of the student in INCLTOP or FULLDEMO

The #EA# is a print only item. It will print the P, Personal email address from PA0001UG/ST1050UG. If there is no email address on the student's record in ISRS, a "No email address found" message will print.

[Note: Current ISRS functionality has only one email address type - 'P'. More functionality to set up prioritization of email address types will be added when these are in place in ISRS.]

The email address is retrieved from the CR_INTERNET_ADDR table in ISRS and can be seen on PA0001UG.

The screenshot displays the 'Prospective Student Information' form for student Patti Nagel. The form includes fields for personal information, address, phone, and email. The email address 'patti.nagel@hotmail.com' is highlighted with a red circle. The form also shows the student's preferred address type as 'P, Permanent'.
