

# INCLTOP #GB

Reset the catalog for the audit when a student is readmitted and already has an Exp Grad Term in ST3602UG, usually because they have already graduated. Their readmittance may be as a graduate student, for instance.

The #GB option uses the following logic:

If the Begin YRTR in ST1104UG is later than the Exp Grad Term in ST3602UG, ignore ST3602UG and use the Begin YRTR in ST1104UG for DARS audit processing. If #04, #05, and/or #08 are used in FULLDEMO1 or 2, anytime DARS does not find or ignores ST3602 data, an asterisk (\*) will print in the FULLDEMO spot(s) on the audit top.
